

NIO E-Learning

Platform **TEEMEA**

Teemea is an educational platform through which teachers create online courses for their students. In addition, they open their classes on the platform, assign tasks to students, communicate with them, conduct live webinars and monitor children's activities and progress, while providing them with feedback.

From health to language teaching

Courses for enthusiasts of any age.

Online courses **REDMONSTER.CZ**

Red Monster are online training courses not only for primary and secondary schools.

APP MY WEATHER BOOK

My weather book is a fun educational application for children, which combines a coloring book and writing practice exercises. Kids can enjoy coloring while they learn to spell.

Educational APP MOBLRN

Moblrn offers a smart and simple platform for creating individual training programs to improve the skills and knowledge of employees. The platform was launched in 2016 and is tailor-made for education using smartphones.

The screenshot shows the Moblrn website interface. The header includes the Moblrn logo, navigation links for Product, Pricing, Partners, and Cases, and a Login button with a 'Try Moblrn' link. The main content area features a dark wood background with the text: "Now anyone can create e-learning for smart phones. Before lunch." Below this text, there is a diagram illustrating the workflow: "Create" (represented by a laptop showing the Moblrn interface), "Preview" (represented by a smartphone showing a preview of the e-learning content), and "Invite" (represented by an arrow pointing to a hand holding a smartphone displaying the e-learning content). An orange "Try Moblrn" button is positioned to the right of the "Create" step.
